

Contents

Thermal physics and thermology

- 6 Device for diagnostics and determination of energy consumption during the operation of a pumping unit
Yuldashev, R. Z., Yuldashev, Z. Sh., & Kasobov, L. S.
- 18 Modernization of the hydrogen production unit by pressure swing adsorption to improve product quality
Ibragimova, A. T.
- 34 Heat metering transducer, satisfying the concept of “subversive” innovation
Vakulin, A. A., & Montanari, S. G.

Fluid, plazma, and gas mechanics

- 50 Numerical study of natural convection stability
Tomchik, P. I., & Kislitsin, A. A.

Mathematical modeling, numerical methods, and software systems. Information technologies

- 68 Mathematical model of free vibrations in above-ground pipelines sections transporting multiphase fluid
Cherentsov, D. A., & Pirogov, S. P.
- 79 The influence of the uneven distribution of deposits in the flow part of the centrifugal blower on the precession of its rotor
Stepanov, M. S., Bunyakin, A. V., Gilaev, G. G., & Dunaev, V. I.
- 95 Accuracy analysis of solving two-phase filtration problem using neural network modeling methods
Ponomarev, R. Yu., Vershinin, V. E., & Kovalkova, A. S.

Development and operation of oil and gas fields

- 114 Criteria analysis of the displacement front instability occurring at waterflooding of oil reservoirs
Kryazhev, Ya. A., Gilmanov, A. Ya., Fedorov, K. M., & Shevelev, A. P.
- 132 New approaches to core samples preparation from bituminous reservoir rocks in Eastern Siberia
Zagidullin, M. I., Potapov, A. G., Molokov, P. S., Dudnik, A. N., & Mikhailenko, O. V.
