

Contents

Thermal physics and thermology

- 6 The methodology for constructing a temperature profile in a flat insulation layer with a nonlinear dependence of thermal conductivity on temperature
Chadaev A. N., Dmitriev A. V., Bikkulov R. Ya., Dmitrieva O. S.
- 20 Spectral stability analysis of the heat conduction equation with convective terms
Skoblikov R. M., Kanonirova E. P., Shevelev A. P., Gilmanov A. Ya., Panova A. V.

Fluid, plazma, and gas mechanics

- 40 Mechanisms of oil displacement from a porous medium using nanofluids based on carbon nanoparticles
Safargaliev R. F., Pakharukov Yu. V., Ezdin B. S., Vasilev S. A., Chuprov A. S., Gumenyuk R. D., Shabiev F. K.
- 60 Study of the influence of forced fluid oscillations on the hydraulic resistance of a pipeline
Konoplev N. G., Korobkov G. E., Yanchushka A. P.
- 87 Study of the effect of non-isothermal conditions on the stratification of a water-in-oil emulsion using mathematical modeling
Gimadeev A. V., Musin A. A., Valiullina V. I., Kovaleva L. A.

Mathematical modeling, numerical methods, and software systems. Information technologies

- 105 Diagnostics of the gas path of a centrifugal supercharger of natural gas with a drive from a free turbine
Inozemtsev D. A., Bunyakin A. V., Dunaev V. I.
- 117 Nonlinear Darcy–Stefan problem for radial Darcy flow in a porous medium during cold-fluid injection
Tarassenko A. A., Prokopenko E. V., Ashcheulova A. S.
- 136 Modeling of non-stationary modes of operation of turbo compressors taking into account deposits formed in the interblade channels of the flow part
Stepanov M. S., Bunyakin A. V., Dunaev V. I.
- 155 The influence of reservoir structure on the reliability of porosity and permeability estimation using the CRM model
Bulanov N. S., Stepanov S. V.

Development and operation of oil and gas fields

- 171 Method for rapid selection of candidate wells for conversion to injection based on the CRMP material balance model
Bekman A. D.
