

Contents

Thermal physics and thermology

- 6 Calculation of the heat stabilizer effective parameters depending on its location relative to the pile
Gilmanov, A. Ya., Kim, A. S., & Shevelev, A. P.
- 25 Methodology for modeling processes in multi-component two-phase LNG systems
Saftly, A., & Zaitsev, A. V.

Mathematical modeling, numerical methods, and software systems. Information technologies

- 45 On the question of comparability of relative phase permeabilities obtained by different methods
Stepanov, S. V., & Vokina, V. R.
- 56 Consideration of geomechanic effects during hydrodynamic model of weakly-cemented reservoir setting
Zubareva, I. A., Stepanov, A. V., & Gavris, A. S.
- 69 Mathematical modeling of the duration and frequency of water consumption by water collection devices of a residential building
Polivanov, D. E., Semenov, A. A., & Movsesova, L. V.
- 88 Construction of compositional geological models using the variational grid method of geomapping and the object-hierarchical approach
Plavnik, A. G., & Sidorov, A. A.
- 104 Comparative analysis of filtering methods for measurement data from complex well configurations
Shengeliya, D. Yu., Kovalenko, I. V., & Zakharova, I. G.

Reviews, Critique, Events

- 121 The cutting-edge research school of Prof. Alexander B. Shabarov
Druzhinina, O. M.
