

## Contents

### Thermal physics and thermology

- 6 Prediction of the temperature distribution in the reservoir when oil is displaced by a fluid with a temperature different from the reservoir  
*Vydysh, I. V., Fedorov, K. M., & Shevelev, A. P.*
- 23 Formation of a nanostructured film at the “hydrocarbon — graphene nanofluid” interface  
*Pakharukov, Yu. V., Shabiev, F. K., & Safargaliev, R. F.*

### Fluid, plazma, and gas mechanics

- 39 Mathematical model of killing an oil horizontal well  
*Korotchenko, A. N., & Kislitsin, A. A.*
- 59 The method of calculation of relative phase permeability functions based on the empirical interfacial interaction function  
*Zagorovskiy, M. A., Stepanov, S. V., & Shabarov, A. B.*

### Mathematical modeling, numerical methods, and software systems. Information technologies

- 75 Simulation of liquid production and water cut dynamics using fluid flow model and neural networks  
*Legostaev, D. Yu., & Kosyakov, V. P.*
- 93 The simulation of non-stationary gas pressure in a pipeline with pumping and injection  
*Chuprov, I. F., Lyutoev, A. A., & Parmuzina, M. S.*
- 108 Modeling the spread of an infectious disease with fly-in-fly-out work method  
*Podzolkov, P. N., & Zakharova, I. G.*
- 128 Compact multifilament model of resistive switching metal-oxide memristor  
*Ebrahim, A. H. A., Gubin, A. A., Busygin, A. N., & Udovichenko, S. Yu.*
- 139 Mathematical modeling of a new method for processing a seismic signal on the example of a section of the Saratov right bank. Part 2  
*Fonin, A. A., Suchkov, S. G., Nikolayevtsev, V. A., & Mikheyev, S. I.*
- 153 Gas purification technology from oxygen  
*Toropov, E. S., Pisarev, M. O., & Shariddinov, Kh. Sh.*
