

CONTENTS

THERMAL PHYSICS AND THERMOLOGY

- Gorelik J. B., Zemerov I. V.
Influence of the surface water reservoir to the thermal regime of frozen ground 10
- Kuzina O. A., Shabarov A. B.
Calculation and experimental method for determining the filtration parameters of the mixture “oil — aqueous solution of surfactants” 41
- Ponomarev K.O., Kuznetsov G. V., Feoktistov D. V., Orlova E. G. Maksimov V. I.
On heat transfer mechanism in coolant layer on bottom cover of a two-phase closed thermosyphon 65
- Grigoriev B. V.
Development of a calorimetric method for measuring the content of unfrozen water in soil at a negative temperature 87

Ishkov A. A., Anikin G. V.
Determination of the optimal step of installation between the evaporator pipes and the number of condenser units of the system of temperature stabilization of soils HET 100

Kishalov A. E., Zinnatullin A. A.
Study of the soil temperature effect on the operation of a low-capacity power plant’s condenser 118

FLUID, PLAZMA, AND GAS MECHANICS

- Asalkhuzina G. F., Davletbaev A. Ya., Khabibullin I. L., Akhmetova R. R.
On the selection of suitable operate durations for injection tests in low permeability reservoirs 135
- Gayazov M. S., Valiullin R. A. Yarullin R. K.
The method of regular temperature labels in measuring phase flow rates in low-flow horizontal wells 150
- Aktaev N. E., Penkina T. A.
Applicability of the approximation of Stokes for calculating the velocity of a steam-air jet over a locally heated water surface 166

**MATHEMATICAL MODELING,
NUMERICAL METHODS
AND SOFTWARE SYSTEMS.
INFORMATION TECHNOLOGIES**

Gilmanov A. Ya., Kovalchuk T. N.,
Shevelev A. P.

**Physical and mathematical modeling
of cyclic steam stimulation for oil
reservoirs.....176**

Bekman A. D., Pospelova T. A.
Zelenin D. V.

**A new approach to water cut forecasting
based on results of capacitance
resistance modeling.....192**

Ivanov A. V., Stepanov S. V.

**Mathematical modeling of a well
performance in view of nonequilibrium
relative phase permeability208**
