

Contents

Thermal physics and thermology

- 6 Analytical model of non-isothermal filtration of gasified oil in a reservoir with a hydraulic fracture
Davletshin F. F., Sharafutdinov R. F.
- 24 Biopolymers as inhibitors of hydrate formation: A review
Novikov N. S., Drachuk A. O.

Fluid, plazma, and gas mechanics

- 53 Modeling the movement of preformed particle gel in a porous medium
Abaturov G. S., Gilmanov A. Ya., Shevelev A. P.

Mathematical modeling, numerical methods, and software systems. Information technologies

- 70 Modification of the CRM material balance model for three-phase flow conditions
Galeev A. A., Sinitsyna T. I.
- 93 Construction of universal neural network solutions for families of boundary value problems of the piezoelectric equation
Ponomarev R. Yu., Ivlev M. I., Migmanov R. R., Vershinin V. E.
- 119 Numerical effects in hydrodynamic modeling
Ivantsov N. N.
- 136 Computational efficiency of memristor models in the hardware spiking neural network synaptic array simulation
Busygin A. N., Udovichenko S. Yu.

Development and operation of oil and gas fields

- 156 Determination of boundary oil cut-offs of domanic deposits of the Volga-Ural oil and gas province by NMR method
Zagidullin M. I., Potapov A. G., Fadeev A. M.
